Industry portfolio delivered – lifetime value managed

Industry	Tenure	Value	Industry	Tenure	Value
AI, Data & Automation	7 yrs	\$2.4M	Web3 / FinTech	11 yrs	\$1.8M
Retail & eCommerce	5 yrs	\$1.6M	Enterprise IT / IAM	1.3 yrs	\$1.2M
Healthcare	5 yrs	\$900K	Workforce Development	1 yrs	\$650K
Total modeled portfolio value influenced across industries					\$9.35M

WHAT I DELIVER

Revenue and technical discovery professional with experience building qualified pipelines, running IT/workflow discovery, and translating operational pain into product value, solution requirements, and repeatable AI workflows. Connects account signals, customer data, security concerns, and AI tooling into clear next steps for sales, product, and delivery teams.

CORE COMPETENCIES

AI Systems: LLM prompt engineering, prompt design, prompt iteration, text generation, image generation, agentic data analysis, AI application design, AI workflows, multi-widget workflows, multi-modal surfaces, inference reliability, pipeline architecture, RAG, DynamoDB, AgentCore, Strands SDK

APIs & Integration: REST APIs, JSON payload handling, Webhook concepts, OAuth flows, CRM integrations

Data & Evaluation: Data ingestion, pipeline modeling, baseline evaluation, model evaluation frameworks, output quality review, dashboard automation

Security & Compliance: HIPAA-aware architecture, data privacy design, Responsible AI, blockchain security primitives, Third-party risk, governance, compliance, cloud, identity, and payments-systems transformation

Platforms: Amazon PartyRock/Bedrock, no-code AI tools, automation frameworks, chatbots

EXPERIENCE

Business Development Representative - Firstbase (acquired by AppDirect)

Feb 2026 - May 2026

New-logo SaaS sales role supporting IT and operations teams managing distributed employee onboarding, device lifecycle, identity provisioning, and offboarding automation

- **New-logo pipeline development.** Led discovery across five territories with IT and operations leaders, surfacing onboarding, device logistics, and provisioning gaps that created urgency for lifecycle automation.
- **Account intelligence.** Used account signals and sales intelligence tooling to prioritize outreach, segment prospects, and build pipelines around distributed workforce and IT operations use cases.
- **Security and integration alignment.** Addressed early-stage concerns around SSO, identity provisioning, and device logistics, translating technical friction into workflow, security, and operational value.

Sales Engineer - Diverse ICT

Jan 2026 - Present

Pre-sales advisory role supporting managed IT, cybersecurity, cloud, automation, data management, DevOps, SecOps, helpdesk, licensing, and technical staffing engagements

- **AI governance advisory.** Advised clients on access controls, audit trails, incident documentation, and AI governance requirements, helping translate emerging AI risk into practical operating controls.
- **Identity and access risk review.** Evaluated client environments for identity governance readiness, surfacing shadow IT, access sprawl, and separation-of-duties gaps that could increase audit exposure and operational risk.
- **Managed IT solution shaping.** Conducted pre-sales discovery across client technology environments, converting undefined needs into scoped service requirements and billable project frameworks.

Business Development Representative - re:WORK Training

Jan 2025 - Nov 2025

Partnership-development role supporting a nonprofit tech-sales accelerator's employer pipeline, donor engagement, and corporate training growth

- **Partnership pipeline development.** Built employer and donor pipeline through approximately 15 monthly discovery calls, using HubSpot insights to identify mission-aligned accounts and surface new partnership opportunities.

- **Market and account targeting.** Improved qualified-lead conversion through LinkedIn Sales Navigator outreach focused on hiring signals, workforce-development priorities, and corporate social-impact alignment.
- **Multi-channel engagement.** Executed coordinated outbound campaigns across email, calls, and social media, improving engagement against outreach targets and supporting employer partnership growth.

Founder, AI Systems & Workflow Development - Quincy Labs

May 2022 - Present

Founder-led AI product and workflow development across agentic AI, medical AI research translation, personal compute infrastructure, and autonomous software-testing systems

- **Medical AI product development.** Building a sickle-cell anemia AI platform focused on longitudinal patient context, structured evidence retrieval, patient/provider workflows, and clearer reasoning over complex clinical information.
- **Agentic testing workflows.** Developing CLI-agent workflows for headless iOS app testing, enabling agents to inspect product state, run tool calls, exercise app flows, collect errors, and compress QA/release loops.
- **AI engineering operations.** Operating an AI engineering stack across Claude, Codex/OpenAI, Cursor, MCP servers, reusable skills, and architecture notes to turn research, implementation, testing, and documentation into repeatable agent workflows.

Accenture Clients: Maserati, Walgreens, Amazon, Mondelez Intl.

Jan 2022 - Feb 2025

Enterprise consulting experience across automotive, healthcare retail, technology, and consumer goods clients, supporting CRM analytics, customer preference workflows, LLM evaluation, dashboard automation, and reporting operations

Business Analyst - Mondelez International

Nov 2024 - Jan 2025

Enterprise CPG reporting engagement supporting leadership visibility, dashboard automation, and multi-source operational reporting across global market performance

- **Reporting visibility.** Consolidated fragmented operational data into centralized dashboards, providing leadership clearer access to global performance indicators and market-level activity.
- **Decision support.** Deployed real-time reporting views that reduced dependence on manual status updates and improved the speed of performance review.
- **Reporting workflow improvement.** Standardized recurring reporting workflows and automated handoffs, reducing process friction across data consolidation, review, and leadership-update cycles.

Technical Writer, LLM Evaluation - Amazon Project Neo

Mar 2023 - Jul 2024

LLM evaluation and prompt-quality engagement supporting large-scale NLP dataset development, annotation consistency, and model-output review

- **Prompt dataset development.** Authored 1,000+ prompt/completion pairs across nine NLP task categories, contributing to a 500K-prompt dataset supporting model-output evaluation at scale.
- **Evaluation governance.** Standardized QA criteria, quality thresholds, and output-review practices to reduce inconsistency across high-volume prompt evaluation workflows.
- **Technical translation.** Converted technical prompt requirements into rubrics, examples, and annotation guidance that supported adoption across review teams.

Customer Preference Analyst - Walgreens Boots Alliance

Sept 2022 - Jan 2023

Consent-management workstream supporting customer preference data, vendor onboarding, communication governance, and compliance-aware customer engagement workflows

- **Consent governance.** Supported vendor-onboarding checks tied to customer communication preferences, helping maintain consent-data integrity across engagement systems.
- **Messaging accuracy.** Maintained preference data used to guide customer communication logic and improve consistency across consent-aware messaging workflows.
- **Workflow translation.** Converted cross-team design inputs into preference-driven workflow documentation, improving clarity across teams managing customer engagement and compliance-sensitive communication.

CRM Analyst - Maserati

Jan 2022 - Aug 2022

Luxury automotive CRM engagement supporting customer segmentation, campaign analytics, lifecycle marketing, and lead-follow-up visibility

- **CRM performance analysis.** Converted campaign and engagement data into customer-retention insights, helping account teams understand performance patterns and follow-up opportunities.
- **Cross-functional reporting.** Aligned account, creative, and data stakeholders around CRM analytics, improving clarity of client-facing campaign outputs and performance narratives.
- **Customer segmentation.** Used vehicle and lease data to refine segmentation logic, supporting more relevant marketing audiences and personalized communication strategies.
